PUBLIC NOTICE

BRIDGING QUALIFICATIONS FOR ADMISSION INTO MEDICAL, DENTAL AND COMMUNITY ORAL HEALTH TRAINING PROGRAMMES

The Kenya Medical Practitioners and Dentists Council (KMPDC) wishes to inform prospective students, parents, sponsors, scholarship agencies and institutions offering **Bachelor of Medicine and Bachelor of Surgery (MBChB)**, **Bachelor of Dental Surgery (BDS)** and **Community Oral Health (COH)** training programmes on the criteria for acceptance of bridging qualifications into these programmes.

The criteria require that bridging qualifications be obtained through Kenya National Examinations Council (KNEC) recognised programmes and examinations, that applicants attain the prescribed minimum entry and cluster subject grades and that the bridging qualifications be obtained **before** commencement of the respective training programme. The Council will reject any fraudulent bridging qualifications obtained through examinations not administered by KNEC.

Prospective students and training institutions are encouraged to familiarise themselves with the approved requirements before admission or enrolment to ensure compliance with the Council's regulatory framework and to avoid inconveniences in registration upon completion of training.
